PM102 ADVANCED APPLICATION PROGRAMMING

Farzin Khonshniat, Mohammadreza Taleghani Esfahani, Mehrdad Saraee Sadam Hossain, Farjana Islam, ,Shamsuzzaman Sadi

Fachhochschule Kiel, Kiel, Schleswig-Holstein, Germany

## Architecture

Advantages

- Avoid travelling long distances to the store.
- Save money and time by sending items through mail.
- Control product one in place before paying.
- Help small businesses to promote their products in an area.
- Help people sell items in their house that they don't use anymore.

Functionality

Sell & Buy

User Authentication

Searching for products

Chatting Seller with Buyer

Introduction

This application is always listening to customer request to find the product as soon as the item is put for sale in the nearest location. For example, if someone needs a second hand coffeemaker, then she or he can create the request for the application to notify him or her, when someone nearby wants to sell this item, within the expected price range.

Future Improvement

Online purchase
